

Occupational Health

YES

If you meet the criteria, your manager is required to refer you to Occupational Health via the OH portal. The referral should include your job role, contracted hours and times, impact of disability or mobility impairment, what adjustments or modifications have been made and whether or not these were successful and why. Please see below for more information.

On completion of an Occupational Health management's referral

Following assessment from Occupational Health, a decision will be made regarding support options/adjustments.

A report will be written and released to the referring manager, once consent has been given.

The Sustainability Travel Team will be advised of staff who meet the criteria for an Occupational Health temporary parking permit (name, employee number, service line and duration). No medical information will be shared with the Sustainability Travel Team.

Once complete, staff can continue to the online application to apply for a parking permit under Occupational Health temporary permit (select Occupational Health Complete).
